#### Step 3:

Wait for the app to install on your computer

- You might get a pop-up box that asks you for permission to run the installation, if this happens click 'run'.
- If nothing happens when you click 'install', you might need to click the download button next to the search bar on your browser, and then click on the Zoom installation file to start the download.
- The download button will look something like these:  
- You might also get a pop-up box asking if you want to allow the Zoom app to make changes to your device.

#### Step 4:

Go back to the confirmation email and click the link again.

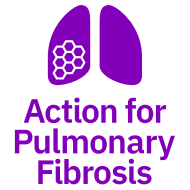

#### Step 5:

Wait for Zoom to open the webinar (this may take a minute or two).

### Step 6:

If the webinar hasn't started yet, you'll see a holding screen. This means the webinar hasn't started yet. Wait on this screen until the webinar starts. Whilst we will always endeavour to start our sessions on time, there may be slight delays with starting the webinar. If you're still seeing a holding screen a few minutes after the scheduled start time, don't worry you've done everything right, the session just hasn't started yet. Stay on that screen and wait for the webinar to start.

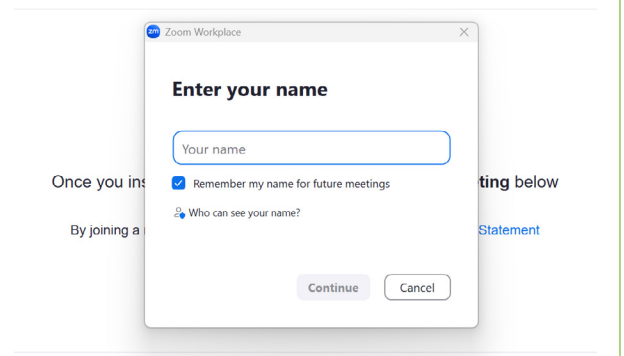

The holding screen might look something like this.

### Step 7:

When the webinar starts, you'll be prompted to enter your name. Type your name and click 'continue'.

You'll then be brought into the webinar, and you don't need to do anything.

## If you already have the Zoom app
